Doubling Time:	20%O2 – 66 hours 5%O2 – 64 hours
Growth Properties:	Heterogeneous culture of adherent cells and suspended cells
STR Profile:	May be obtained at https://strdb.cccells.org/
Notes:	The Childhood Cancer Repository has a matching hypoxic cell line grown at 5% O2 available from this same patient – COG-N-415h. The Childhood Cancer Repository has a matching PDX available from this same patient – COG-N-415x.

All COG Repository cell lines are antibiotic-free, mycoplasma-free, and cryopreserved in 50% FBS / 7.5% DMSO. Each vial label contains the cell line name, passage number, total viable cell count (usually 5-10e6), the overall cell viability, and date frozen. All cell lines are validated with original patient sample by STR analysis
